

BELLA LUCE  
ATELIER

## WHERE BEAUTIFUL SKIN BEGINS . . . AND DOESN'T END.

Whether you want to target signs of aging, reduce breakouts or simply get a gorgeous glow, our Bella Luce Atelier features the latest LED infrared light therapy masks that amazingly boost circulation, speed healing, increase collagen production and more.

To boost your results even further, choose from one of our customized Signature Treatments that include 'mini facials' with pre- and post applications of the best Environ skincare formulas.

Whichever you choose, feel good knowing you're taking care of your skin, and get ready to glow!

## LED EXPRESS TREATMENTS

17 MINUTES UNDER THE LIGHT MASK

INCLUDES A GENTLE CLEANSE, LED AND SPF APPLICATION - \$35

3 x Signature Express Treatments - \$100

5 x Signature Express Treatments - \$165

## SIGNATURE TREATMENTS

Depending on your skin goals and needs, they each include a gentle cleanse and skin preparation with additional formulas applied to the skin, a 17-minute LED session, vitamin intensive moisturizer and SPF application.

### HYDRATE & HEAL

35 MINUTES - \$65

If dry, sun-damaged or winter parched skin describes your skin condition, this treatment is for you. It includes an intense and luxurious hydrating facial with lactic acid peel to add moisture and exfoliate your skin. Followed with an infusion of Vitamins A and C to restore your skin's moisture and firmness, improve texture and reduce irritation. Skin will look and feel renewed, hydrated and glowing.

### THE ANTI-AGER

30 MINUTES - \$65

To target signs of aging, such as fine lines and wrinkles, this treatment is what every woman needs to boost and stimulate, protect and maintain. Starting with a clay masque and active peel before the LED, your skin is then finished with a vitamin infusion of essential A, C and retinol. Do this treatment once, see immediate results. Do a few more, and say 'hello' to a younger-looking, more radiant you.

### GIMME GLOW

35 MINUTES - \$65

Want to keep that 'post yoga glow' going strong? Then you'll want to try this treatment that starts with an intensive Vitamin C peel to really prep and prime your skin and get the most out of the LED. Following, skin is renewed and refreshed with Environ's Vitamin A and C serum, followed with eye gel to plump and hydrate even more. For an everyday beautiful glow, this treatment is it!

### THE PROBLEM SOLVER, 35 MINUTES - \$65

If breakouts, clogged pores and flare-ups describe your skin type, then it's likely time for a tune-up starting with a detoxifying clay masque. Clay can be very effective to treat oily and acne prone skin as it works much like an adhesive, collecting dirt and oil. Followed-up with LED and a phyto-corrective gel, this treatment helps neutralize your skin, calm irritation and reduce future flare-ups with no harsh chemicals.

# LED LIGHT THERAPY, FAQs

## IS IT SAFE?

Unlike other types of light therapy, our LED does not contain ultraviolet rays and is therefore safe on skin. LED light therapy also doesn't cause burns compared to other anti-aging treatments such as chemical peels, dermabrasion, and laser therapy. It may be safe for all skin colors and types.

## WHAT TO EXPECT?

Our LED Express treatments take as little as 20 minutes and include a gentle cleanse with SPF application. Our Signature treatments typically take 30 minutes or longer, depending on the treatment. There is no pain whatsoever, and you will be pampered with loving care from start to finish.

## HOW OFTEN SHOULD YOU DO LED TREATMENTS?

You will see and feel results after 1 treatment, however to really boost your skin's circulation, keep your collagen and elastin production active, and most of all, maintain a healthy, hydrated GLOW, we recommend a series of treatments spaced every two weeks, depending on your time and budget.

## WHO IS LED NOT INTENDED FOR?

You shouldn't use LED light therapy if you take Accutane for acne or if you're experiencing skin rashes. Side effects are rare however may include temporary redness.

## ARE THERE SPECIAL INSTRUCTIONS POST-TREATMENT?

Avoid excessive heat (including hot yoga) and direct sunshine for at least 24-48 hours. This is very important as your skin will be extra sensitive, and needs time to heal.
